## 1.1 GUI

### 1.1.1 Action

#### 1.1.1.1 ExitListener

```
1  /**
   *
   3  */
   package gui.action.menu;

5
   import javafx.event.ActionEvent;
7   import javafx.event.EventHandler;
   import javafx.stage.Stage;

9
   /**
11  * @author Tingle Driftwood
   *
13  */
   public class ExitListener implements EventHandler<javafx.event.ActionEvent> {

15
       private Stage primaryStage;

17
       public ExitListener(Stage primaryStage) {
19           super();
           this.primaryStage = primaryStage;
21       }

23
       /*
25       * ActionListener which close the application.
       */

27       @Override
       public void handle(ActionEvent arg0) {
```

```
29 // TODO Auto-generated method stub
    primaryStage.close();
31 };
33 }
```

#### 1.1.1.2 LoadListener

#### 1.1.1.3 CreateDBListener

#### 1.1.1.4 KillsListener

#### 1.1.1.5 ShowListener

#### 1.1.1.6 TravelListener

#### 1.1.1.7 WriteLogListener
